

Report of the Annual Meeting Volume 1903

Filesize: 6.05 MB

Reviews

It is great and fantastic. I actually have read and so i am certain that i am going to going to go through once again yet again in the future. I realized this ebook from my dad and i encouraged this book to find out.

(Dr. Kayden Gerlach)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: .of the struggle for attraction of material from the surrounding atmosphere; the outer edges, having a wider area to attract material from, grow more than the central portions, which remain uncompleted. We have thus skeleton crystals formed; the centre remains undeveloped, due to the want of material--to starvation. The greater possibilities of attraction are well exemplified by the additional crystal formations at the outer angles of the hexagons, quite similar to the hopper crystals of NaOl. The crystalline forms are exclusively those of the hexagonal flat-topped prism; never has a terminal pyramid nor a hemihedral shape been observed. A great variety of forms of skeleton crystals can be observed under favourable conditions; amongst others, helix-shaped hollow pyramids, analogous to the cubic helices of bismuth; also long solid or helix-shaped hexagonal prisms. The hollow pyramids are built of steps of prismatic rings, invariably with a basal pinacoid face. Often a crystal shows needle-like spikes arranged in decided right angles. This gives the strongest impression of cubic or other rectangular crystals. On careful examination, however, it will always be found that in such a case we have to deal with the incompletely developed rectangular faces of the hexagonal prism, such as we might expect in a skeleton crystal. A series of micro-photographs and sketches will illustrate this. The most favourable conditions for the formation of hoar frost crystals and the best opportunities for studying them are found in the refrigerating chambers as used extensively in Liverpool, and through...
